

PUSHPAK PATIL

AWS Cloud Architect | Senior DevOps Engineer | FinOps Product Builder

+91-8655850932 • Thane, Maharashtra, India • pushpakpatil.cloud@gmail.com

LinkedIn: linkedin.com/in/pushpak-patil-376024300 • Portfolio: pushpak-patil-portfolio.vercel.app • GitHub: github.com/p05-cloud

AWS Solutions Architect – Associate • AWS Security – Specialty • IBM Vault Automation Practitioner

PROFESSIONAL SUMMARY

AWS Cloud Architect and Senior DevOps Engineer with 4+ years of cloud experience across 17+ enterprise financial institutions. Expert in cloud architecture, EKS, Terraform, CI/CD automation, Security Assessments, and Cloud Landing Zones. Built and delivered 16+ infrastructure automations, led cloud modernisation and migration projects, and shipped FinOps AI — a production multi-tenant SaaS live at 3 BFSI clients. Ranked 3rd at AWS Hackathon 2025 (Migratoplaza). Track record: 60% cost reduction, 100% PCI DSS/ISO 27001 compliance, RTO under 10 minutes. Strong communicator — trained 350+ students as founder of Elite Educare Academy.

TECHNICAL SKILLS

- **AWS:** EC2, VPC, EKS, ECS, Fargate, Lambda, RDS, DynamoDB, S3, IAM, Route53, CloudFront, ALB/NLB, CloudWatch, GuardDuty, Security Hub, Control Tower, Organizations, SCP, Kinesis, SageMaker, Secrets Manager, ACM
- **IaC & DevOps:** Terraform, Terragrunt, AWS CDK, CloudFormation, GitHub Actions, Jenkins, GitLab CI, ArgoCD, Helm, Docker, Kubernetes (EKS), Karpenter, Ansible
- **Languages & Scripting:** Python (Flask, FastAPI, Django), Node.js, TypeScript, Bash, Golang (exposure)
- **Monitoring & Observability:** Prometheus, Grafana, PromQL, CloudWatch Container Insights, OpenTelemetry, ELK Stack, Fluent Bit, Distributed Tracing
- **Security:** IAM, IRSA, SCP, WAF, Shield, PCI DSS, CIS Benchmarks, ISO 27001, CSPM, Zero-Trust, Security Assessments, Cloud Landing Zones
- **Databases & Migration:** RDS (MySQL, PostgreSQL, Oracle, Aurora), DynamoDB, ElastiCache (Redis), RDS Proxy, Multi-AZ, Read Replicas, DMS, DB schema migrations
- **Cloud Ops:** Cost optimisation (FinOps), DR design, multi-region architecture, modernisation & migration, capacity planning, incident management

PROFESSIONAL EXPERIENCE

Cloud Solution Architect | Applied Cloud Computing (ACC), Thane, India *March 2025 – Present*

- Lead cloud architecture for 17+ enterprise financial clients — designing scalable multi-account AWS environments, IoT-enabled services, real-time data pipelines, and ML model deployments
- Design Python backend services (Flask, FastAPI) — RESTful APIs, IoT device management, time-series processing, and SageMaker ML inference endpoints
- Architect and deliver cloud modernisation and migration projects — application rearchitecture, DB migrations, and lift-and-shift to containerised workloads on EKS/Fargate
- Own full DevOps lifecycle: Terraform provisioning, GitHub Actions CI/CD, Prometheus/Grafana monitoring, and zero-downtime Kubernetes rolling deployments

DevOps & Automation Lead | Applied Cloud Computing (ACC), Thane, India *March 2024 – February 2025*

- Led automation practice — built 16+ cloud infrastructure automations for cost optimisation, compliance remediation, and operational workflow automation across client portfolios
- Conducted Security Assessments and Cloud Landing Zone (CLZ) implementations for banking clients — IAM hardening, CSPM, GuardDuty, Security Hub, WAF/Shield configuration
- Managed EKS clusters for microservices workloads: Karpenter autoscaling, IRSA, Helm deployments, HPA/VPA resource tuning, and CrashLoopBackOff incident resolution
- Established CI/CD best practices: blue/green and canary deployments, image scanning (Trivy), policy-as-code (tfsec), and GitOps workflows with ArgoCD

Cloud / DevOps Engineer | Applied Cloud Computing (ACC), Mumbai, India *March 2022 – February 2024*

- Designed and implemented AWS Landing Zones with Terraform for financial institutions (SBGIC, HDBFS, Bandhan Bank, Edelweiss, TMF) — multi-account Control Tower, SCPs, cross-account IAM
- Achieved 100% PCI DSS and CIS compliance through automated Config Rules, Security Hub, and custom Python remediation scripts — zero critical findings in external audits
- Delivered 20–60% cost reduction via rightsizing, Savings Plans, VPC Endpoints (eliminating NAT costs), and serverless migration
- Led DB migrations (Oracle/MySQL → RDS Aurora), multi-region DR design, and migration of 50+ monolithic apps to EKS/Fargate microservices

Founder & Lead Tutor | Elite Educare Academy, Thane, India *March 2015 – March 2022*

- Founded and managed educational institution with 20 teachers, training 350+ students in Cloud Computing, AWS, Linux Administration, Networking, Security, and Python Programming

KEY PROJECTS | 17+ ENTERPRISE CLIENTS

- **TMF – EKS Optimisation:** Resolved memory leaks + API throttling; HPA/VPA tuning. Result: OOMKilled restarts –98%, deployment success 60% → 99.5%, uptime 99.95%.
- **Edelweiss – Microservices Modernisation:** Rearchitected 50+ monolithic apps to EKS/Fargate + Terraform + GitLab CI/CD. Result: 35% cost reduction, deploys monthly → daily.
- **ATLAS – Automated Multi-Region DR:** Lambda State Machine failover with zero manual steps. Result: RTO under 10 min, DR testing 8 hours → 30 minutes.
- **SBGIC – Cloud Migration:** End-to-end AWS migration, multi-AZ VPC + Direct Connect hybrid. Result: 100+ servers, 99.95% uptime, MTTR –35%.
- **HDBFS – Compliance & Cost Automation:** Terraform + Config Rules + Security Hub for PCI DSS/CIS. Result: 100% compliance, 60% cost reduction, 95% manual effort saved.
- **RBL Bank – Azure to AWS Migration:** Migrated GitHub Enterprise Server from Azure to AWS using Terraform — version upgrade + optimal infra design. Result: Zero data loss, 45% performance gain, 30% cost reduction.
- **Mirae Asset – Full IaC Implementation:** Designed and delivered entire AWS infrastructure using Terraform — VPC, EKS, RDS, IAM, ALB, monitoring stack. Result: 100% IaC coverage, reproducible environments, zero manual provisioning.
- **APAC – DB Migration & Security Assessment:** Migrated Oracle/MySQL to RDS Aurora Multi-AZ + conducted full Security Assessment (IAM, CSPM, CIS). Result: RTO 15 min, RPO 5 min, zero critical security findings.
- **HDFC – Governance Dashboard Automation:** Built an automated AWS Governance Dashboard — cost, compliance, tagging, and security posture visibility across accounts. Result: Real-time governance reporting, 90% reduction in manual audit effort.
- **IDBI – Control Tower Landing Zone:** Deployed AWS Control Tower multi-account Landing Zone with SCPs, IAM guardrails, and account vending automation. Result: Standardised governance across all OUs, compliance-ready from day one.
- **Axis – Air-Gapped EKS Operations Platform:** Deployed on-premises, an automated operations platform on an air-gapped EKS cluster with no internet connectivity. Result: Full container orchestration and automated ops in an isolated environment.
- **ICICI Securities – HCP Vault On-Premises:** Deployed and configured HashiCorp Vault on-premises for secrets management, dynamic credentials, and PKI. Result: Centralised secrets governance, eliminated hardcoded credentials across all services.

PRODUCTS BUILT

FinOps AI — Multi-Tenant Cloud FinOps Platform for BFSI

- Production-grade, multi-tenant SaaS for cloud cost visibility and optimisation. Live at 3 BFSI clients. Integrates AWS, Azure, and GCP billing under FOCUS-spec data model with AI-powered rightsizing, anomaly detection, Savings Plans optimisation, tagging governance, and budget alerting.
- Stack: Next.js 15, TypeScript, PostgreSQL 16, Redis, BullMQ, Prisma, Docker, Helm, GitHub Actions, ArgoCD, Turborepo. Multi-tenant Row-Level Security, BullMQ workers consuming CUR/Azure/GCP billing exports.
- Impact: 80% reduction in manual cost review effort, automated compliance governance across multi-account cloud environments per client.

InfraOps AI — Automated Incident Remediation Platform

- Detects infrastructure anomalies, classifies severity, and triggers auto-remediation via AWS Systems Manager and Lambda. Reduces on-call burden and MTTR for cloud ops teams.
- Stack: CloudWatch, Lambda, Systems Manager, Prometheus, Grafana, Python. Target: 70% reduction in L1 ticket volume, sub-5-minute automated remediation.

CERTIFICATIONS | EDUCATION

- AWS Certified Solutions Architect – Associate
- AWS Certified Security – Specialty
- IBM Vault Automation Practitioner Advanced
- BSc Chemistry — Mumbai University

AWARDS | RECOGNITION

- AWS Hackathon 2025 — Migratoplaza — Ranked 3rd Nationally
- Excellence in Cloud Cost Management — Applied Cloud Computing
- Cross-Team Collaboration Excellence — Applied Cloud Computing
- Anchor Project Excellence — Applied Cloud Computing
- Rooky Award — Applied Cloud Computing
- Persistence Award — Applied Cloud Computing
- Organisational Growth Leader — Applied Cloud Computing
